

The task consists of two steps. First, we ask you to select the correct option from the list, Yes or No.

If the answer is "No or not enough evidence" then you can move on to the next task.

Otherwise, there will be the second step: we ask you to select the words that were important for your answer in the first step. To check if some word is important try removing it from the sentence and answer the question again. If the answer doesn't change, then this word is not important. For example, articles (a, an, the) are never important. You should always highlight at least two spans: the words that are highlighted in the question, otherwise, you'll get an error `ARRAY_SIZE_LESS_THAN_MIN`.

IMPORTANT due to the technical limitations it is very important to follow the guideline for selecting the words:

1. select the highlighted spans always as one span (see examples below)
2. select all other words separately
3. you have to select at least two spans, otherwise, you will get an error message.

How to complete the task

1. Read the question and the text carefully. Pay attention to the words highlighted in bold.
2. Select the correct answer from the list.
3. If the answer is "Yes", you will be asked to select the important words for answering the original question. Use the lowest block for this.
4. Select the tag **Important** from the panel.
5. Double-click a word to select an individual word. To highlight a sequence of words, place the cursor at the beginning of the first word and drag it to the end of the last word, then release.
6. To delete a tag, click on the word.

Tips

- The highlighted words should be always marked as important (see examples below).
- Highlight all other words **separately**!

Examples

Square brackets denote the start and the end of the span. It is important to follow the guidelines above to pass the training.

Question: Does "new Anglican Church in North America" have "100,000" employees or members?

Sentence: The new Anglican Church in North America has an estimated 100,000 members.
